Government of Ontario.

MEP CONTRIBUTORS

Aaron Hershoff, TACC Developments
Adam Poon, Markham Environmental Advisory
Committee (MEAC)
Adriana Gomez, Toronto & Region
Conservation Authority (TRCA)
Alan Kirschbaum, Ministry of Energy
Alex Benzie, QUEST Ontario
Amanda Flude, IESO
Amy Bing, Unionville High School student
Andrew Bauerbank, EllisDon Corporation
Ashok Bangia, Markham Environmental
Advisory Committee (MEAC)
Atiq Rahman, City of Markham - Asset
Management
Bala Gnanam, Building Owners & Managers
Association (BOMA) Toronto
Bernice Chan, IESO
Bill Chihata, York Region
Bill Wylie, Alectra Utilities
Bob Webb, Webb & Co Ltd.
Brent Kopperson, Windfall Ecology Centre
Brian Byrnes, Ministry of Energy
Brian Lee, City of Markham - Engineering
Bruce Ander, Markham District Energy Inc.
(MDE)
Carmina Tupe, BILD GTA
Chris Bird, City of Markham - Building
Standards
Christina Hoicka, York University
Christine Tu, TRCA
Dan Horchik, The North Markham Landowners
Group
Danielle Chin, Building Industry & Land
Development (BILD)
Darryl Yahoda, IESO
David Clark, York Region Rapid Transit
Corporation (YRRTC)
David Gabay, German Mills RA
David Teichroeb, Enbridge Gas Distribution
Inc.

Eamonn Flaherty, Miller Thomson LLP
Emily Grant, Malone Given Parsons Ltd
Erika Lontoc, Enbridge Gas Distribution Inc.
Fahimeh Kazempour, Alectra Utilities
Frank Dixon, Grandview RA
Harry French, Ontario Sustainability Services
(OSS), Windfall Ecology Centre
Husam Mansour, Pollution Probe
Ian McVey, TRCA
Jimmy Lu, Toronto Atmospheric Fund
John Genest, Malone Given Parsons Ltd
John Smiciklas, Building Owners & Managers
Association (BOMA) Canada
Joseph Palmisano, City of Markham -
Engineering
Josh Shook, Ministry of Energy
Kailyn Smith, City of Vaughan
Kirby Calvert, University of Guelph
Luc Simard, City of Markham - Mayor's Youth
Task Force (MYTF)
Luisa Da Rocha, IESO
Mara Samardzic, Building Industry & Land
Development (BILD)
Marg Wouters, City of Markham - Planning &
Urban Design
Marina Haufschild, City of Markham - Planning
& Urban Design
Marion Plaunt, City of Markham - Planning &
Urban Design
Mark Hanlon, York Region

CONTENTS

1 EXECUTIVE SUMMARY	1
A roadmap to achieve the objective of net zero energy and emissions	2
The process of developing the mep	4
Engagement	6
Modelling	7
The low carbon scenarios	10
The financial impacts	13
Implementing the actions	16
The programs	17
A communications plan	21
Evaluating	22
2 SETTING THE CONTEXT	25
2 Introduction	26
2.1 The state of play	26
2.2 The municipal energy plan	28
2.3 The definition of net zero	30
2.4 A strategy to get to net zero	33
3 The process of developing the net zero plan	35
Stage 1: Current conditions	36
Stage 2: Identifying actions	37
Stage 3: Evaluating low carbon futures	37
3.1 Engaging stakeholders	38
4 What are the current conditions?	42
4.1 2011: The baseline year	43
4.2 The geography of Markham	43
4.3 The population of Markham	45
4.4 What kind of buildings do people live in?	48
4.5 The relationship between energy and emissions	52
4.6 Key questions	82
3 EXPLORING THE FUTURE	83
5 The current trajectory	84
5.1 The business as usual scenario	85
5.2 Insights from the BAU	111
5.3 Conclusions from the BAU	113

6	Exploring the low carbon future	115
6.1	The future of energy	116
6.2	The actions	118
6.3	The moderate low carbon scenario (LC-mod)	120
6.4	An ambitious low carbon scenario (LC-amb)	127
7	The results of the low carbon scenarios	128
7.1	Wedges diagrams	130
7.2	The impact of the low carbon scenarios on the energy system	134
7.3	Energy results	137
7.4	GHG emissions	140
7.5	Buildings	143
7.6	Transport	146
8	Achieving net zero	154
8.1	Transit, district energy and land use	155
8.2	Renewable natural gas	160
9	Insights from the net zero pathway	163
10	The targets	166
11	Managing uncertainty	171
11.1	What does sensitivity analysis tell us?	171
11.2	Variables and Results	172
	Synopsis	177
12	What are the financial impacts of the low carbon pathway?	177
12.1	Introduction	178
12.2	Financial analysis of the actions	179
12.3	Financial analysis of the scenarios	185
12.3	Spending on energy	188
12.4	The big picture	195
12.5	Employment impacts	204
12.6	Getting all the way to net zero has additional costs	206
13	Transformation through innovation	209
13.1	Mapping the actions to strategies	210
13.2	Programs	214
13.4	Financing	223
4	IMPLEMENTATION	227
14	Mobilizing the community	228
14.1	Stakeholders and Engagement Activities	231
14.2	Net Zero Partners	234

15 Monitoring and evaluation	238
15.1 Annual work plan and review	239
15.2 Annual indicator report	239
16 Conclusion- the low carbon future beckons	244
APPENDICES	244
Appendix 1 - Model assumptions	245
Appendix 2- Document review list	251
Appendix 3- List of actions	253
Appendix 4- Energy cost projections	255
Appendix 5- Acronyms and glossary	262
Appendix 6- Stakeholder Working Group Recommendations	265
Appendix 7- Local Improvement Charges Implementation Report	268

KEY ENERGY AND EMISSIONS UNITS

GHG EMISSIONS

1 ktCO₂e = 1,000 tCO₂e

1 MtCO₂e = 1,000,000 tCO₂e

ENERGY

1 MJ= 0.0001 GJ

1 TJ= 1,000 GJ

1 PJ= 1,000,000 GJ

1 GJ= 278 kWh

1 MWh= 1,000 kWh

1 GWh=1,000,000 kWh
